🔗 Kishan Pokal Portfolio

Education

Integrated MSc in Computer Science,

08/2022 – 05/2027

Rollwala Department Of Computer Science, Gujarat University

Studying core subjects like Data Structures, Artificial Intelligence, Web

Development, and Database Management. Completed B.Sc phase in June 2025.

Currently pursuing advanced coursework in AI and Full-Stack Development. Built 3 academic projects: Hotel Management System, Tourism Management System, and Online Book Selling System using technologies like PHP, JSP, Java, and MySQL.

Skills

Programming Languages

Kotlin, Java, Python, C++, C#, SQL

Database & Backend

Firebase Authentication, Cloud Firestore, Room Database, MySQL

Technologies

Artificial Intelligence (AI), Prompt Engineering, Responsive UI Design, Offline-First App Development

Android

Jetpack Compose, MVVM Architecture, Navigation Compose, Material 3, StateFlow, ViewModel, Android SDK

Web Development

HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap, JSP & Servlets, Responsive Web Design

Tools & Platforms

GitHub, Figma, Postman, Excel, Tableau, Android Studio

Soft Skills

Problem Solving, Team Collaboration, Communication, Time Management, Adaptability, Critical Thinking

Projects

TrackEasy – AI-powered Expense Tracker 📄, (Published on Google Play)

Built a modern Android expense tracker using Kotlin and Jetpack Compose featuring:

- Expense & income management
- Receipt scanning using Google ML Kit OCR
- Budget planning and financial insights

AttendMate – Attendance Management System 📄

Technologies Used: Kotlin, Jetpack Compose, Firebase

- Developed an attendance management application for students.
- Built a companion website for attendance management and reporting.
- Implemented attendance tracking, user authentication, and data synchronization.
- Designed responsive web interfaces and modern Android UI.

Maunam: The Silent God – Horror Game, *(In Development)*

Technologies: Unity 6 LTS, C#, URP, Android SDK, ProBuilder, Shader Graph

- Developing a first-person Android horror game centered on a real-time microphone-driven detection mechanic.
- Built enemy AI using Unity NavMesh with a 5-state behavior system (patrol, alert, search, chase, dissolve).
- Engineered inscription-stone puzzle system with mic-volume-based activation and branching true/normal ending logic.

Online Book Selling System

Technologies Used: PHP, HTML, CSS, JavaScript, MySQL

- Developed an online platform for users to buy, sell, and manage books.
- Integrated user registration, secure login, product listings, and admin controls.
- Built a user-friendly interface with responsive design and real-time inventory management.

Tourism Management System

Technologies Used: JSP, Java Servlets, HTML, CSS, JavaScript, MySQL

- Built a tourism package booking portal with admin and user roles.
- Implemented session management, secure login, and package management.
- Designed responsive front-end and handled backend data operations using MySQL.

Work Experience

Currently Seeking Internship or Entry-Level Role

Looking to gain hands-on experience in software development, web technologies, or data analytics.

Certificate

Build Your Generative AI Productivity Skills

Learned how to apply Generative AI tools for business productivity and creative solutions.

Introduction to Prompt Engineering for Generative AI

Developed skills in designing effective prompts for AI tools like ChatGPT, improving real-world communication and output.

Data Analytics Virtual Internship

Completed hands-on simulation tasks in data analytics and forensic technology using Excel and Tableau.
